

Price list
Including the manufacturing of test specimens

A - Mechanical tests

1	-	tensile (torsion) test at room temperature	490
1a	*	graphic record of tensile (torsion) test	45
1b	*	additional determination of coefficient n or r	110
2	-	tension test at elevated temperature	1005
3	-	hardness test	95
3a	-	hardness test in a line - gradient (more than 5 indents)	48
4	-	impact test at room temperature (RT)	550
5	-	impact test at defined temperature to -70 °C	680
6	-	impact test at temperature with the use of liquid nitrogen	1100
7	*	the portion of ductile fraction, lateral expansion (only as part of impact test)	105

B - Manipulating tests

10	-	flattening test of tubes to $\text{Æ} 160$ mm	230
11	-	flattening test of tubes above $\text{Æ} 160$ mm	370
12	-	chisel test	285
13	-	drift expanding test, flaring test of tubes	230
14	-	ring expanding test of tubes	345
15	-	ring tensile test of tubes	425
16	-	crush (tamping) test	230
17	-	bend test or fracture test of weld	370
17a	-	face and root bend test of weld for parent metal thickness $t > 10$ mm	520
18	-	weld bead bend test	635

C - Corrosion tests

20	-	corrosion test - basic rate	2015
21	*	intergranular corrosion test (exposition to 24 hours)	550
21a	*	intergranular corrosion test (exposition to 12 hours)	105
21b	*	intergranular corrosion test (exposition to 120 hours)	3020
22	*	pitting and crevice corrosion test (exposition to 24 hours)	105
22a	*	pitting and crevice corrosion test (exposition to 120 hours)	1910
23	*	corrosion test - Huey test (5 cycles at 48 hours)	8950
24	*	additional metallographic evaluation of corrosion and depth of attack	590
25	*	sensitizing per furnace batch (max. 6 pcs.)	950

D - Macroscopic tests

31	-	macroscopic evaluation by step machining	635
32	-	macroscopic evaluation by fracture test	320
33	-	visual macroscopic evaluation	245
34	-	macroscopic test by evaluation of etching ground section	425
35	-	determination of the δ -ferrite content in the austenite by EMG method	100
36	-	hardenability test	3395

E - Microscopic test

40	-	mounting and preparing microsection	405
41	*	descriptive or comparative evaluation of microstructure	280
42	*	microstructure evaluation by measuring and calculation	400
43	*	macro and microstructure test of weld on microsection	400
44	*	heat treatment for outlining austenitic grains	1295

Price list
Including the manufacturing of test specimens

F - Spectrometric tests

50	-	spectrometric test by stable spectrometer	860
51 *	-	tentative analysis	380
52 *	-	recasting of chips to bulk specimen on GarriCast	360

G - Other tests

60	-	evaluation of the surface layers by pickling removal and weighting	455
61	-	removal the surface layers by pickling (for another tests)	255

H - Other works

80 *	-	original photo	125
81 *	-	additional copy of photo	25
82 *	-	laboratory heat treatment for 1°C / furnace batch / 1 hour + 1 hour for ramp	1
83 *	-	workshop beyond the usual manufacturing of test specimen for 1 hour	700
84 *	-	expert's work	1150
85 *	-	test report writing	275
86 *	-	transport by car for 1 km, including driver	20
87 *	-	transport by small truck for 1 km, including driver	25
88 *	-	time on road exclude driver and waiting at the customer	350

L - Surcharges and discounts

110	-	surcharge in the range of tests, depending on cutting material thickness			
		thickness in mm	ordinary material	tough material	
		t < 6	-	5 %	
		6 ≤ t < 12	5 %	10 %	
		12 ≤ t < 24	15 %	20 %	
		24 ≤ t < 48	25 %	30 %	
		48 ≤ t < 72	35 %	40 %	
		72 ≤ t	45 %	50 %	
111	-	in the case of large batch of the same type test a base rate can be reduced up to			30 %

M - Additions and notes

- All prices are in Kč and without VAT
- For an items with * does not apply the surcharge depending on cutting material thickness
- We can arrange express performance tests (overtime, public holyday and night) for a surcharge.
- For samples of complicated shapes or hard-workable materials we will charged for necessary costs in the hourly rate of workshop - item 83.
- For some tests (for example macrostructure test, hardness) is necessary mounted and prepared small samples as microsection - item 40.
- For some tests and shapes of samples is possible to make a testing tools by agreement with the contractor in the hourly rate of workshop - item 83.
